Signing this form authorizes Champion Wheel Co. Inc. to build a set of custom wheels to your specifications, as written on this form. **If you do not understand the dimensional measurements found in the drawings provided with this order form, DO NOT SIGN THIS FORM.** Champion Wheel drag race wheels are considered custom wheels, and therefore are not returnable under any circumstances. Champion Wheel will stand behind the quality of the wheel AS ORDERED. We recommend that you double check measurements before ordering. If you have any questions or concerns regarding fitment of these wheels, please call our technical department at (951) 471-2183 before making an order. Orders will not be processed without authorized signature.

BOLT PATTERN DIAGRAMS: The TRUE bolt pattern is the diameter of the circle ALL 5 LUGS are placed on, through the center of each lug. The best way to measure this is shown in the diagrams below, referencing the “MEASURED BOLT PATTERN” specifications. If you have any questions regarding this measurement or if your measurement does not match the provided specifications, please call (951) 471-2183.

WHEEL MEASUREMENT DIAGRAM: This diagram illustrates all of the critical measurements of our Speed Series and Cap5 wheels. Take note of the barrel diameter as well as beadlock inside diameter. These will be critical measurements for both double beadlock applications, as well as wheels (even non-beadlocked) that have a backspace larger than 4 inches. This diagram also illustrates the proper way to measure wheel width and backspace. Please call with any questions regarding these measurements. (951) 471-2183
